## Organization Can Overcome Crisis In Unemployment

Professor Marsh Gives First Lecture On Economic Question

### CAUSES DISCUSSED

Rise And Fall In Trade And Industry Hinders Steady Work

Only a world-wide organization to control industrial fluctuation can cope with the vital problem of unemployment. This was the conclusion arrived at by Professor L. C. Marsh, Director of the Social Science Research Council at McGill, in his lecture, yesterday, on "Types and Causes of Unemployment", held at the Central Y.M.C.A. This begins a series of six weekly talks by Professor Marsh on the various phases of unemployment — its causes and remedies.

In considering the subject, the four adjectives, complex, communal, permanent and international should be kept in mind. The problem is, by no means, an individual one and must be dealt with by such organizations as the League of Nations, in co-operation with smaller local bodies. Furthermore, unemployment is not peculiar to times of depression, and is experienced more or less by every generation.

**Causes of Unemployment**  
Diverse causes bring about and maintain unemployment. There is the daily fluctuation on the labour market, which chiefly affects the unskilled, unorganized worker. Nearly every employee is at one time or another laid off due to seasonal conditions in his industry.

Probably most important of all are the international factors, such as foreign trade and monetary systems. Here, especially, would a universal organization improve conditions. Ever since the Industrial Revolution, the world has undergone, in almost regular sequence, a series of booms and depressions. This cyclical change, with its ultimate economic turmoil and business failures has added measurably to unemployment figures.

**Lack of Organization**  
The introduction of labour saving devices has sent its quota of men scanning the newspaper help-wanted ads. The need for proper organization is seen in the occasional employment bureau. Even in good times, it is well nigh impossible to fit a man into a position, commensurate with his ability.

Finally, one should take into account the personal or individual factor. In many instances, mental and physical disability or sheer inefficiency have reduced people to the breadlines. In all fairness, however, unemployment is generally the result of environmental conditions, over

## Anglican Debaters Meet This Evening

World Disarmament To Be Subject Of Discussion

Since Disarmament seems to be a major issue in university circles the forthcoming debate of the Anglican Theological students which is to take place this evening at 8:30 p.m. in the Convocation Hall of the Diocesan College, is in keeping with the spirit of the times. The full text of the subject in question is "Resolved that Disarmament will produce international amity and world peace", and the debaters have been chosen from the members of the student body resident in the college.

The Affirmative team is to be composed of Arthur Marshall, winner of the Bovey Shield for public speaking in 1928, and Hubert Doody, who is a senior in the Faculty of Arts. C. E. F. Wolff and Cyril Earle both in Theology will support the Negative aspect of the resolution.

The judges, are to be the Dean of Montreal, Professor W. T. Waugh, M.A., F.S.C., Head of the Department of History at McGill and Algy S. Noad, M.A., Assistant Professor of English at McGill.

These debates are held under the auspices of the Literary and Debating Society of the College and take place at regular intervals throughout the year.

### Glee Club

There will be a meeting of the Glee Club tomorrow at 7:30 P.M. in the Union Ballroom.

## R. V. C. French Club To Stage Variety Of Skits To-morrow

A VARIETY of sketches will feature the meeting of the Societe Francaise to-morrow afternoon in the R.V.C., at four o'clock. Each year is presenting a skit, and a prize is to be awarded to the year presenting the best one. This is a different type of meeting to that which is usually held.

During the past, there has been some misunderstanding as to who is eligible to attend these meetings. The predominant idea seems to be that only those who speak French as their native tongue, or at least, those who speak French very fluently are admitted. This is decidedly incorrect, for the Society is primarily for those who are desirous of improving their French conversation.

An invitation is especially extended to Freshettes. During the course of the meeting, business on hand will be discussed.

## Band Featured at Graduates Reunion

Total Attendance Amounted To Seventeen Hundred

### EXHIBITS ARRANGED

Demonstrations And Clinics Held For Graduate Engineers And Doctors

"One of the features of the recent Graduates' Reunion was the playing of the McGill Band," stated Mr. Glasco, Secretary of the Graduates' Society in an interview yesterday. "Their playing helped to make the Convocation parade a success, and their performance at the Smoker was particularly noteworthy. Appreciation of their assistance was expressed at the meeting of the Executive of the Graduates' Society Monday evening."

The Graduates' Reunion, which was held from October 14th to 17th was very successful despite the present bad business conditions. Twelve hundred and twenty graduates registered, and many others attended one or more events without registering for the reunion, so the total attendance was probably in the neighbourhood of seventeen hundred. Profits realized by the Reunion were \$460 most of these coming from registration.

**Exhibits Well Attended.**  
The attendance at the preliminary luncheon on September 29th was 421. The Smoker was attended by 519, 462 went to the dance, and 603 to the banquet.

Exhibits were arranged at the five McGill Libraries and seven Museums, and were well attended. The demonstrations in the Macdonald Physics Building, and the clinics at the Montreal General Hospital, Royal Victoria Hospital, Children's Memorial Hospital, Royal Victoria Montreal Maternity Hospital and the Shriners' Hospital for Crippled Children attracted large and appreciative audiences.

**Reunion Considered Successful.**  
A special Dental programme was also arranged at the Montreal Dental Clinic and exhibitions were shown in the Macdonald Engineering Building and the Macdonald Chemistry (Continued on Page Four)

## Newman Club Tea Dance Approaches

Will Be Held In Mount Royal Saturday

On Saturday afternoon, November 21st the ladies of the Newman Club are entertaining at "The Dansant" in the Salle Dore of the Mount Royal Hotel. Frank Cotte has been engaged to furnish the music and with his fine orchestra and the pleasing atmosphere of the Salle Dore, those in charge feel that an entertaining afternoon is assured for all.

A great number of tickets have already been sold but the large Salle Dore will permit the comfortable accommodation of a good many more, so that those wishing to secure tickets will have no difficulty. The Newman Club welcomes all students of the University, for the tea dance is not exclusively for the members of the Club. Anyone wishing to obtain tickets or further information on the subject, kindly phone Katherine Hingston, Lancaster 0575.

## Apartment Homes Considered In Cercle Debate

W. L. Barnes And d'Honichun Are Victorious

### DINNER DISCUSSED

Meeting In Favour Of Program Of Monthly Banquets

Private homes were considered to be superior to apartments by a vote of the meeting of the Cercle Francaise, last night in the Union Grill Room, after a debate on the subject. Fred Knowles, Com. '33 and Bud Coolican, Eng. '33 upheld the affirmative side of the proposition, "Resolved that apartment houses are preferable to private residences." Rene Cazin d'Honichun, Com. '34 and W. L. Barnes Com. '33 opposed them.

Following the debate, several opinions were expressed on the matter. After this, the proposal that a dinner be held once a month, at which only French will be spoken, was warmly discussed. The meeting was unanimously in favour of this. The executive will look into the feasibility of the project. P. Welschberger, the president, was in the chair.

**Services In Apartment**  
Coolican, in opening the debate on the affirmative side, stated that apartments existed from the time of the Romans. It was a necessity that men lived together in that time, and in the Middle Ages, for mutual defence. The apartment affords many services that private homes lack, such as heating and cold and hot water. It also costs less to live in an apartment, which is an important consideration.

W. L. Barnes pointed out that apartments were often poorly ventilated. Light is also usually bad. There is really no privacy, for one can see and hear what one's neighbours do. There is also interference by the neighbours who would protest at a party after twelve o'clock.

**Ceilings Useful**  
A large cellar is very useful, an advantage not present in an apartment. There is also a yard, connected with most homes, which provides a place for children and the cultivation of flowers. In closing, the speaker gave the word of a fictitious interview with Charlie Chaplin, in which he stated modern apartments may be likened to caves of savages.

F. Knowles, in continuing the arguments of the affirmative side, said that balconies could be used to grow flowers. He emphasized the advantages that accrue to an apartment dweller. An apartment is a great help to the housewife, as she doesn't have to run up and down stairs, and has the advantage of a janitor, indolent, etc. In summing up, an apartment (Continued on Page Four)

## Annual Executive Board Announced

Final Years Not Co-operating With Editors

Announcement was made last night of the board of Editors of the McGill Annual for the current year. Saul Hayes is taking over the duties of Editor-in-Chief and H. Mayerovitch will be the Art Editor. The Associate Editor, this year, will be R. Nichols, while A. Minnion and V. J. Goulding are Photography and Women's Editors, respectively.

The Executive Board is composed of R. K. Denton, S. Wallace, T. Slattery, G. Raymond, S. Klein, C. Wolff, J. Price and M. Porter. The Advisory Board consists of G. Nichols and R. Bowman.

The first statement of the new Board was that this year's Annual will contain many innovations and, in their opinion, it will be one of the finest Annuals ever issued. They also stated that students in final years are not turning out to Notman's to take their pictures. This is seriously handicapping the progress of the Annual. This also applies to the biographies which are not being filled or handed in as they should be. Students are asked to do this, as it will make the work of the board much easier.

## No Refunds To Ticket Holders After Saturday

The Athletic Manager announced to-day that there will be no more refunds issued by the Athletic Office to Season Ticket holders on Student coupons, after Saturday, November 21, 1931.

## Bruce Scholarship Available To First Year Engineering

DEAN ERNEST BROWN, of the Faculty of Engineering announces that the Robert Bruce Scholarships which have been awarded for several years in the Faculty of Arts and Science are now also available to First Year Engineering students.

They are provided through the will of the late Robert Bruce, of Quebec City. The scholarship, of the annual value of \$100.00, is tenable for three years, and will be awarded by the Faculty for high standing in the sessional examination at the end of the year.

For the first twenty-five years preference will be given to students of Scottish extraction. The announcement states also that the right is reserved to cancel the Scholarship after the second or third year if the work of the holder should prove unsatisfactory.

## Association For Artists Founded

Drawing, Painting And Modelling Will Be Taught

### McGILL REPRESENTED

Society Is First Center Of Modern Art In Canada

The Department of Extra Mural Relations of the University in conjunction with the Mechanics Institute of Montreal announce the formation of the Atelier. The association has been formed for artists to study and practice the arts of Form, Drawing, Painting and Modelling will be taught and thoroughly studied.

It was found essential that a center for the study of free development of the arts should exist among the various educational institutions in Montreal. Canada, together with the other Anglo-Saxon countries adhered, until a few years ago, to a strong but dying tradition of romantic art. It is only within the last decade or so that Canadian painters have shown any curiosity towards, or tendency to take place in, this renaissance which commenced in France in the early sixties.

**Recent Critical Attitude**  
The founders of the Atelier feel that there must come a break of the movement before they can forge ahead in their study of it. The last seventy years have been characterized by an unprecedented and intensely critical attitude towards the fundamental aims of art. This has resulted in a new realization of the necessity for Order and Structure. In many respects this is a return to the classical point of view, that is, an intellectual reaction as opposed to an emotional one. It may be described as a harmony of man-made form in contrast to the chaos of nature as the eye sees it.

The hope to develop a living tradition through an awareness of the best tendencies of the present day in all countries must be fulfilled by the Atelier. The emphasis on the study of form, in any medium, will be its guiding principle.

The members hope to hold public lectures from time to time. These will deal with the more recent developments in Architecture, Sculpture and Painting and other applications of functional design which have arisen from modern conditions.

### Personal of Staff

The Executive committee and the teaching staff of the Art School consists of the following: Hazel Sise, chairman; Elizabeth Frost, in charge of the Atelier; Wilfrid Bovey, who will represent McGill; Dr. Milton Hersey, who will represent the Mechanics Institute; Andre Bellier; Prudence Howard; Randolph Hewton; Richard Bolton; George Holt; Kenneth Crowe; John Lyman; Jeannette Meunier; Lilias Newton; Sarah Robinson; Mabel May; and Annie Savage.

## Chemical Club Will Visit Plant Friday

On Friday November 20, the Chemical Industry Club plans to visit the Robert Mitchell Co. This trip promises to be both instructive and interesting, and all who can go should avail themselves of the opportunity. As cars will be the only means of transportation, anyone who can supply one is urgently asked to be on hand on that date. Those who intend to go are reminded that the journey starts from the Chemistry Building at 3 P.M. sharp.

## In Players' Club Production

HUME CRONYN

BARBARA MEAGHER

HUME CRONYN and BARBARA MEAGHER who take the parts respectively, of the Cashier, around whom the action of the play centres, and the Italian Lady, in "From Morn to Midnight" which the McGill University Players' Club is presenting in Moyse Hall commencing tomorrow night.

## Seniors In Arts Express Opinions On Departments

French Considered Weakest Course By Majority

General Diffidence Shown By Fourth Year Students

In an earnest attempt to discover from the opinions of the seniors in Arts and R.V.C., just what departments are weak, from the point of view of professors or of the courses given, a number of prominent seniors were interviewed yesterday on the campus, in the library, the hall of the Arts Building or where ever they could be cornered.

Most of them, when they found that they could not escape, first inquired as to whether their names would be given or not, and discovering that such would be the case, either promptly declined to state an opinion, or asserted that every course they had taken so far had surpassed all expectations, and no faults could be found with any of them. Indeed, Bill Sellar, a well known figure on the campus, said that as far as he could tell, Mathematics was the weakest department, for after three years they let him pass in Maths. 1.

**French Course Ridiculed**  
French was the target for mockery and derision from two seniors, namely, Watson Gilean, who stated, "The French course is a good rest cure for those who are afflicted with insomnia, because the people with insomnia (Continued on Page Four)

## Sir Arthur Lauded For Pension Stand

Head Of Federation Speaks At Special Meeting

At a special executive meeting of the Canadian Workers Federation of Returned Soldiers and Sailors, Saturday afternoon, Sir Arthur Currie was lauded for his work in connection with the Board of Pension Commissioners and Pension Appeal Court. In the matter of pensions, by John Brownie, president of the Federation.

"It takes one of the standing and high character of Sir Arthur Currie to secure that public attention and consideration for our comrades and those they left behind them to get justice," continued Mr. Brownie. "It confirms all that our own Federation said at the last meeting. Our organization has steadfastly demanded that the Board of Pension Commissioners or the Pension Appeal Court be abolished. It is not only an outrage, but a reflection on the Pension Tribunal," said Mr. Brownie, "that decisions rendered after an examination of the applicant, the destitute widow of a comrade, or his dependents, should be immediately appealed by a representative of the Board of Pension Commissioners.

"In this connection I want to say that our honorary legal adviser, Bernard Rose, K.C., when he first learned of all this, did not hesitate to outspokenly denounce the attitude to which Sir Arthur Currie has likewise taken exception.

## Electrical Colloquium To Hear A. Krumping

There will be an Electrical Engineers' Graduate Colloquium at 5:30, to-day in Room 35 of the Engineering Building. The speaker, Mr. A. Krumping, B.Sc. (M.I.T.), will present a

## Council Approves Table Service in Union Grill Room

But Women Will Not Be Allowed To Eat In Union House

### BUDGET APPROVED

Tramway Passes For All Students Not Available—Engineers Hold Dance

Table service in the Union Grill Room will be available to students within a short time if the recommendation of the Students' Council to the Union House Committee is acted upon. While the executive, meeting last night, approved of this extension of the activities of the Cafeteria they frowned upon the suggestion made in the Daily yesterday that women be given the right to eat in the Union. The chief objection was the present lack of equipment suited to women's needs.

Ken Baker reported that efforts, in conjunction with the University of Montreal, to secure student privileges from the Tramways Commission for all University students, regardless of age, had met with failure.

Word was received from the secretary of the National Federation of Canadian University Students that the annual convention will this year be held at McMaster University in Hamilton during December 28-31. The McGill delegate to this conference will be Chick Parish.

The third annual Engineer's Frolic will be held in the Union on New Year's. The affair will be officially under the guidance of the Engineering Undergraduate Society. The budget submitted on the dance was turned over to the Social Functions Committee of the Council.

The budgets of the Player's Club, the Red and White Revue and the Choral and Operatic Society were passed by the Budget Committee. Included in these items was new lighting equipment for Moyse Hall which has already been purchased.

In accordance with established custom, Millard Astwood, past President of the Students' Society was appointed Council representative to the Advisory Committee of the Faculty and graduates. In recognition of their work this year the Council passed resolutions in appreciation of the cheer leaders and the University Band.

## Manchurian Strife Will Be Discussed

League Of Nations Club Will Meet Tomorrow

On Thursday next, there will be a meeting of the League of Nations Club of McGill at 8:30 in Strathcona Hall. The speaker for the evening will be Mr. Phelps, B.A. of Yale, and his subject will be "The Manchurian Situation."

Mr. Phelps who has lived in Japan for sixteen years is qualified to handle this complicated question as he has been connected with press and governmental circles in the country which has been the centre of world interest for the past month.

It is therefore hoped that all students and others interested in the Manchurian Question in particular and in the problems of current international politics in general will attend this meeting and take part in the discussion which follows the subject of the evening.

## Engineers Discuss Faculty Magazine

Ramsdale And McGee Appointed To Management

An interested group of Engineering students last night discussed the possibilities of a Magazine which would contain news relative to the Faculty activities as well as technical articles of general interest.

Plans for the proposed Magazine are indefinite, although it was agreed that the price would be at a popular rate and the number of issues limited to three a year.

T. W. Houghton, who conducted the meeting, appointed D. Ramsdale and L. McGee to look after the financial details. These two men will be glad to receive suggestions from those interested.

## Ballyhoo?

The student disarmament movement was conceived in all sincerity by persons who had utter belief in the potency of their action as a step to end war. It is somewhat disconcerting, then, to have their efforts labelled Ballyhoo as one of the correspondents has done. The epithet places a humane endeavour in the same class as cheap campaigns for political ends which have burst upon us from time to time.

Whether we agree with the analysis of the Manchurian situation or not it should be obvious that the present aggression offers every reason why disarmament is absolutely necessary. Without arms there would have been no war. The same condition obtains in Europe. Countries are armed to the teeth and in some cases are itching for conflict, but that fact is not a reason for armaments; indeed the European situation is an example of what competitive armaments can lead to. Obviously the time to disarm is when the presence of armaments threatens war.

The same argument was brought up at the Debating Union meeting last month. Speakers pointed with alarm to the tensions between France and Italy, Poland and Germany, and then completely reversed the argument to show that disarmament is impossible. Why? Do not these conditions completely justify the abolition of the means of carrying on warfare?

The only means at hand of expressing mass opinion in favour of disarmament is by a petition. It is ridiculous to ask "Why are not certain things done?" and then pooh-pooh the only possible means by which the desire that those things be done can be expressed to our leaders. It is almost certain that any politician with a straight party following will hesitate to voice his opinions or act on such a question unless he feels that there is an urgent demand from some source that such opinions and actions are desirable. What better source than the massed student body? True, at present that group is not to be considered as a factor at the polling booth but it would be an unwise man who would deliberately fly in the face of a body of people who will be a not inconsequential force in public life within a few years.

## Looking Ahead

Each year a large Freshmen class enter the University bent on the pursuit of knowledge and with the idea of equipping themselves for life with all that a college course can offer. Yet very few of them look ahead and try to picture their college days as something else than a grind for knowledge. Those that come to McGill purely for the technical learning offered them may graduate and enter the business or professional world as highly efficient and qualified as adults in their particular line of study, yet they have missed at least half of what a good college education can give them.

If these students had started out in their Freshmen year with the idea that college is a place where they can learn how to live, how to think and how to make the best use of the knowledge they acquire at the University, then their college days would have been well spent and they would have been something more than a machine absorbing knowledge.

Unfortunately a large percentage of students become completely engrossed in the educational aspect and fail to make proper use of the advantages offered them in other directions. The jump from high school to college is a broad one; at school they are considered more or less as children, but once in the University are looked upon as young men and women and put entirely upon their own resources and it is up to themselves to make the best use of the opportunities afforded them. The new student must adjust himself or herself to the new surroundings and it is better that this adjustment be gradual and studied, rather than impetuous.

He or she should realize at the outset, that outside of the educational facilities, a college course offers golden opportunities for forming friendships—friendships that are life long and of such great importance in later years—as well as opportunities of seeing a wide panorama of individuals, of studying how they live and act and in this way devising a code of living that will mark him or her as a person of good taste and intelligence.

The student who looks ahead and sees the great avenues of discovery that his college course offers will undoubtedly be the student that will make the best use of his college days and after graduation will carry away something more than a parchment scroll.

# CODEX INJUSTINIANI

Mores mutantur et  
nos non mutamur  
in illis.

## Introduction

In view of the fact that the committee has been flooded with entries for the contest announced in these columns on the 4th of this month we are forced to discontinue the contest herewith. The entries are of high quality, technically and as regards subject matter. We are extremely sorry however that none of them will appear in print owing to their symbolic nature which might easily be misinterpreted by psychopathic readers. In expressing our fervent thanks to those who favored us with their productions we also hasten to assure them that their labours were not in vain. Selections will appear from time to time in the "Zentralblatt für die gesamte Phnologie und verwandten Wissenschaften", and copies of this journal will be sent to the authors.

A reader who signs himself "Superannuated" maintains that the articles in the code are capable of different interpretations than those given here. We invite him to offer his views imposing upon him the sole condition that they be expressed in a logical and readable manner.

## Article V

### Mens sana in corpore sano

Speaking strictly and in conformity with the best logical opinion of the day the article cited here for comment is not a moral precept. At least it wasn't. However it has become so in this century mainly under the influence of Anglo-Saxon educational methods. The battlefields of Eton and Harrow have grafted this Roman maxim on the body ethical of to-day.

That mental capacity develops with development of the biceps or that chest expansion has any relation to the expansion of cerebral activity is so manifest an absurdity that it is surprising with what awe this article is earnestly defended even by raucous educationalists. Notwithstanding the lack of connection between hair on the chest and differential equations an increasing number of pedagogues has accepted the tenet and has applied it to their teaching methods.

At present Germany seems to be the foremost supporter of the callisthenic school of education. Possibly the explanation is to be sought in the fact that the Teuton is a near relative of the Saxon and his kind. It is not a rare thing for the visitor to Potsdam or Darmstadt to behold the cheering spectacle of fields of "clean limbed" boys and muscled maidens, waving their limbs in an attempt to acquire a "corpus sanum" and getting nothing but "athlete's foot". Even Mussolini's potential voters perspire freely endeavouring to resuscitate the emasculated brain-cells and so make the name of Italy "echo down the halls of Time".

It is edifying therefore to regard in the light of this doctrine the physical constitutions of earlier leaders in the various provinces of human knowledge. Would the Sun Life Insurance Company for instance issue policies to the following specimens of corpora, decidedly non sana as Nietzsche, El Greco, Leopardi, Voltaire, Heine, Milton, Luther, Pto, the Maid of Orleans, George Sand, Chopin, Rousseau, Cellini, Kant, Melville, Balzac, Swift, De Quincey, Coleridge and all others who shook hands with trees.

In conclusion we advance the most irrefutable proof that the article is not tenable. An individual possessing both a healthy mind and a healthy body would be perfect, and perfection admittedly is not within reach of poor mortals.

In hoc signo vinces.

## Obiter Dicta

When the next war comes, let us pause and meditate that soldiers always march to the sound of wind through chestnut instrument and to the reverberations of the membrane of a goat.

George J. Nathan

Letter from a Texas chiropractor to a young woman who informed him that his diagnosis was in error, as given in the Journal of the American Medical Association:

—I thank you for your remittance. Your account with me is square.

It gives you relief to know that other doctors do not agree with me and the Laboratories. I am mighty glad. It should free your mental anxiety. If no more. I trust that myself and the Laboratories are mistaken though. It is hope against hope; as you surely have poison of some sort in your blood stream causing you trouble and this poison must have a source. Your vitality is low 33. There is 8.8 ohmes of streptoxemia in your blood-stream. This I do not doubt nor do I doubt but that it is composed of Influenza Toxemia, Acidosis, Choleraemia, Bovine Syphilis and a small sarcoma in area of gaul sic! bladder. For your peace of mind and wellbeing I truly hope it is all a mistaken diagnosis. Wishing you health with plenty of wealth to enjoy it . . . .

Xantippe liked to talk almost as much as Socrates did; and they seem to have had some dialogues which Plato failed to record.

W. C. Durant

The doctor took an eager look and said it was the end. A tear was shed by one who said she was his lady friend. A guy was there with sober air to hear his dying word, to hire the hearse, dismiss the nurse and have the man interred.

Peggy Bacon

Except for two mistakes the earth would have been a success. One of these errors was the in-

clination of the ecliptic; the other was the differentiation of sexes.

Henry Adams

Howling:

What are rabies and what would you do for them? Rabies are Jewish priests. I should do nothing for them.

The dog came bounding down the path emitting whelps at every bound.

Our father which are in Heaven. Harold he thy name.

A Bull howling:

A virgin forest is a place where the hand of man has never set foot.

## CORRESPONDENCE

### A Reply to Belloc

The Editor,

McGill Daily.

Sir,

Mr. Belloc's letter in Tuesday's Daily cannot be allowed to pass without comment. His theme, with a few discursions, runs somewhat as follows. The disarmament petition was so much "ballyhoo", and the whole outward attitude towards disarmament to-day is one of hypocrisy, witness the Manchurian situation. It would appear from his letter that the great powers acting through the League of Nations have decided that Japan should seize Manchuria before Russia has the chance. If this is the case, then talk of disarmament is hypocrisy indeed, and the League, as Mr. Belloc recommends, would be better abandoned.

However, like Mr. Belloc "with no sources of external information", I suggest that there is another and less cynical interpretation of the facts. In a very difficult situation, the great powers are acting together to preserve peace. They are acting through the great international tribunal available for such purposes, the League of Nations. This is something new, and it possesses a moral force that "pre-war diplomacy" lacked.

To-day, the League finds itself at the cross-ways. In the past decade, it has settled with varying success quarrels between small states, notably the Balkans and South America. This is the first time that a great nation has definitely violated its rules. The League must face the problem. Will Japan be made to respect the articles of the Covenant to which she has sworn? Or is there to be one set of rules for small states and another for a great power? The League's future depends upon its answer. The delicacy of the task before the League's statesmen cannot well be exaggerated, but there is no reason to suppose they will fail, and no one can deny the vast superiority of this new form of diplomacy to the methods employed in the summer of 1914.

There can be no doubt that there is a real need for an institution such as the League in the modern world. Abuses might be introduced into its functioning, as Mr. Belloc suggests, but that must not be allowed to detract from its true importance. Too much must not be expected from it at once, but to treat it as a mere debating society, or even as a sort of international morality squad, would be a serious blow to the whole future of our civilization.

In conclusion, may I add that if the "wicked communists" from the Queen City really coached Mr. Belloc in the sentiments expressed in his letter, there was after all a better reason for putting them in prison than the newspapers had led us to believe.

I am, Sir, etc.,

Brian J. McGreevy.

### And Another

Editor,

McGill Daily.

Dear Sir:

Mr. Hilary Belloc's highly provocative letter calls for a reply, and though I feel that I am unworthy to make that reply, I am sending this in, because if everyone waits for someone worthier, no reply will be made.

I imagine most people concur with Mr. Belloc in deploring the ludicrous situation in which Japan can occupy territory in Manchuria in defiance of the League of Nations. But I earnestly beg to differ with his suggested courses of action:

(1) He says that we ought to abandon the League, because it has failed to stop hostilities in Manchuria. Admittedly, the League of Nations is a very imperfect instrument. Many other firmly established institutions are just as imperfect, eg. democracy, and yet we continue to support them in the hope that we can improve them. If people would support the League instead of stamping it as useless, it would be able to do some good.

(2) He recommends recognizing Russia as an economic factor. I would say that it has been already recognized as an economic factor, and is most people as an unpleasant one. The trouble is that she is not content to be merely economic.

(3) We are to educate the masses to see the folly of nationalism. Yes; but disarmament must come first, and the best way of getting disarmament is to support the League, who will then be able to do all the talking about lice, and other minor horrors.

His fourth point I agree with, and have mentioned above.

Sincerely,

"S. S. Voice."

### "CAUGHT PLASTERED"

To the Editor,

McGill Daily,

Dear Sir:

I am a Wheeler-Woolsey fan and an enthusiastic admirer of Mr. Woolsey in particular. Further, my allowance is not what it used to be and I am forced to depend entirely on the McGill Daily for my information regarding movies. The Daily

## Mary Munn Recital Ritz-Carlton Hotel

A large and appreciative audience attended the recital given last night in the ball-room of the Ritz-Carlton Hotel. This was the pianist's first appearance to a Montreal audience since returning from London, England, where recently she gave a most successful recital.

Miss Munn's playing last night was all the more interesting because of her wonderful enjoyment which influenced her execution throughout the recital. The program opened with the Italian Concerto by Bach. The artist, then settled into the Beethoven A flat major Sonata. This magnificent work admirably exhibited Miss Munn's ability at the piano. A group of some of the best of Chopin's works then followed. It was in this part of the program that the artist was at her best.

The recital was brought to a close by a group of lighter numbers by Glazounov, Albeniz, Medtner, and Debussy. Miss Munn's success may be attributed largely to her wise selection of program. She was rewarded by two well-deserved encores.

—R. A. S.

was paid for in my fees. I had no say in the matter.

Therefore sir, I would appreciate it, oh very much! if your reporter or movie reviewer "C.L." saw fit to include the name of the picture in his write-up. Somehow I'd like to know the name of any picture of Wheeler and Woolsey before I go to see it. I am Scotch and dislike walking two whole blocks for nothing! I never see the same picture twice!

Anyway, what was the name of the Wheeler-Woolsey film?

Yours, with curiosity,

A. M.

### This Universe

The Editor,

"McGill Daily."

Sir,

We wish to congratulate your reportorial staff on their latest masterpiece of inaccuracy—the report of Dr. de Sitter's lecture on Monday night. It was exceeded not even by the reports of Dr. King's and Dr. Terroux's lectures. Inasmuch as there seems to be a certain amount of popular interest in the theories concerning the nature of the universe, your readers may be interested in learning just what Dr. de Sitter did say.

First, he did not discredit the theory of the expansion of space, as the headline writer would have us believe. On the contrary, the whole point of his hour and a half lecture was to advance proofs that space is expanding. How even a layman could miss that escapes our comprehension. And just where the reporter got the last part of the penultimate paragraph—"and that it (the universe) neither expands nor contracts"—is another mystery.

There are some other minor inaccuracies. To mention two—Dr. de Sitter spoke of globular clusters (of stars), not of "globular stars;" the Doppler principle states that the

## NOMINATIONS

For The Students' Executive

Council and Scarlet Key Society

CLOSE TODAY

# NOTICE

Nominations for Members of the Scarlet Key Society are herewith called for.

### GROUP "A".

Nominees must be full undergraduates in good standing in their Third Year, with the exception of the Faculty of Law where the nominees will be in their second year.

There must be four or more nominees from the Faculties of Medicine, Engineering, Arts, Commerce. Three or more from Dentistry, and two or more from Law.

Nominations must be signed by 10 undergraduates of the same faculty as the nominee and no undergraduate must sign more than four nominations.

### GROUP "B".

Nominations for Group "B" members from the Faculties of Arts, Commerce, Engineering and Medicine are also called for. Nominees shall be members of the Second Year in each faculty and there must be three or more nominees from each faculty.

All nominations must be signed by at least 10 undergraduates of the same faculty as the nominee and no undergraduate shall sign more than three nominations.

All nominations must be in the hands of the Secretary of the Students' Society by 12.00 Noon, Today.

Elections will be held by the faculties on November 27th, 1931.

G. H. FLETCHER,  
Secretary.

## Doubleheader Polo Fixtures Set For Tonight at Y.M.H.A.

Senior And Junior Teams  
Visitors at Mount  
Royal Tank

### HARD STRUGGLES

BOTH the McGill polo teams see action again tonight, when they meet the strong Y.M.H.A. teams in a regular league doubleheader. The games will be played at the Y.M.H.A. pool on Mount Royal Avenue, and as they are away games for McGill, student coupons will not be accepted at the door and an admission charge of thirty-five cents will be made. The junior game will start at 8.30, and there will be the usual swimming and diving attractions between the two games.

McGill met the "Y" boys in the early part of the season at the K. of C. and both teams emerged on the short end of the score, the juniors losing by the score of 10-0, while the McGill seniors were also blanked 2-0. It is felt, however, by the teams that they had hardly struck their stride at that time, and the boys look to making a much better showing in the games tonight, although the Hebrew lads are always a hard team to beat, especially in their own pool which has various peculiarities which are rather hard on a visiting squad.

### Matthams Back

The senior game tonight will mark the return to college polo of Phil Matthams, stellar defenceman of McGill teams for the past seven years. Phil has been unable to play in the league so far this season, although he has been attending practices regularly, but he will be available now for the balance of the season and for the intercollegiate series. His addition to the squad should result in a greatly strengthened defence, a weak point on the senior squad so far this year.

The juniors have at last hit their winning stride and their score of 9-0 against Columbus on Monday was reminiscent of the great junior line-up of last year. If the boys can keep on playing the same sort of polo for the rest of the season they may well finish the season well up in the (Continued on Page Four)

## SPORT NOTICES

### INTERCLASS BASKETBALL

The following teams have already signified their intention of entering the interclass basketball league: Engineering 1, 2, 3, 4; Arts 2, 4; Medicine 1, 2, 3, 4; Commerce 2; the faculty of Architecture; the faculty of Law. Those still to be heard of are: Arts 1, 3; Medicine 3, 4, 5; Commerce 1, 3, 4; the faculty of Dentistry. Those teams expected to get practice hours are asked to see Coach Van Wagner in the Physical Education office some time today.

### COMMERCE FOOTBALL

All players who have not turned in their equipment must do so immediately. Equipment may be left at the office of the Strathcona Hall.

### FRESH-SOPH SWIMMING

The freshman-sophomore swimming meet will be held on Friday at 5:30 p.m. Entries may be made to Manager Russ Payton or by signing the lists posted at the Knights of Columbus pool.

### COMMERCE '32 BASKETBALL

The manager, Bunny Talpis, is asked to enter his team without delay and secure a practice hour sometime this week.

### SENIOR BASKETBALL

There is still plenty of room for newcomers to try out for the team. Practices are held daily in Montreal High Gym.

### BASKETBALL MANAGERS WANTED

Two men to act as Assistant Basketball Managers in charge of Interclass basketball, wanted at once. The future Senior Manager will be picked from this group. Apply to F. M. Van Wagner, 3434 University St.

### R.V.C. '32 and '34

Will all those, in the second and fourth years, who are interested in basketball, please turn out to a practice today at 3 P.M. in Convocation Hall.

### ARTS '33 BASKETBALL

An hour has been arranged from 6-7 on Friday evening in the Girl's Gym of the Montreal High School.

### Soccer Game

The following men will turn out today at 3 p.m. for the game with the High School "All Stars": Evelyn Kelloway, Janikun, Duder, Smart, Pollard, Sinclair, Nolan, Johnston, Lynn, Carter, Swift, Andrews, Ritchie, Doubilet.

### Forward Passer

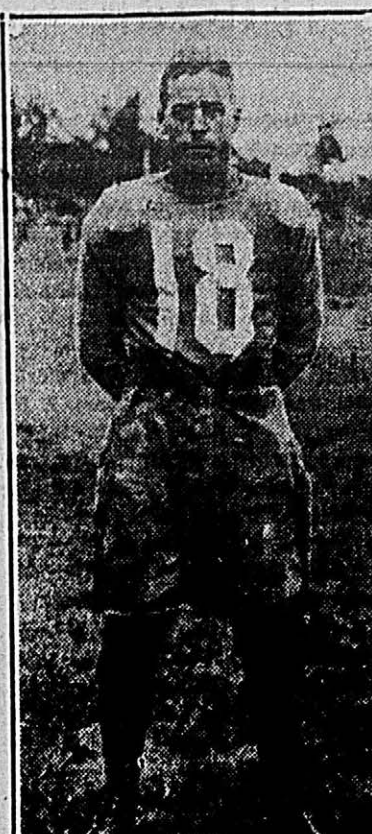

AL KRUKOWSKI, whose fine plunging and ball handling wins for him the pivot position on the all-star team

### Flying Wing

DON YOUNG, without whom no all-star cast is complete has for the fourth consecutive time been selected on the first line-up.

### Unanimous Choice

JERRY HALPENNY, veteran snap-back, whose sure tackling and all round work comes in for merited recognition.

## RUGBY RAMBLINGS

By J. J. M.

### PLAYERS HANG UP SHOES

Football, the greatest of all intercollegiate games, that basks in the spotlight of fickle fandom for but two brief months, has come and gone, and so far as McGill is concerned may be placed in the category of forgotten things until ten long months roll by. However the feats of this seasons edition of the Redmen will not soon be forgotten, and football has beyond a doubt been once again restored to its place of eminence at old McGill.

It is at this time of the year that it becomes the fad to endeavour to select the mythical All Star teams, and while we do not lay any claims to being a shrewd judge of football talent, the following lineups represent our humble efforts to draft a cast of the mighty in intercollegiate circles.

1st Team	Position	2nd Team
Young, M.	Flying Wing	Reist, Q.
Doherty, M.	Half Back	Sinclair, T.
Hammond, M.	Half Back	Gilmore, Q.
Carter, Q.	Half Back	Kennedy, W.
Krukowski, M.	Quarter	Caldwell, Q.
Halpenny, M.	Snap Back	
Galloway, T.	Inside Wing	Gugino, W.
Stuart, Q.	Inside Wing	Stanyar, Q.
Hämlin, Q.	Middle Wing	Dewar, T.
McLachlin, W.	Middle Wing	Valériote, W.
J. Keith, T.	Outside Wing	Dediana, Q.
	Outside Wing	Newton, M.

Without a doubt, there is plenty of room for criticism of our chosen few: tastes and opinions are bound to vary widely, but it must be admitted that both aggregations carry heavy scoring and strong defensive threats, and would be most capable representatives of intercollegiate football.

There will not be any argument about Don Young's selection, he has established a record, during his four years at college, that has seldom been equalled and never surpassed. The backfield may be the cause of some argument in other quarters, many will claim that Sinclair of Varsity or Gilmore of Queen's should be included in the first team; well maybe they should, but whose place could they take, not Doherty's, not Hammond's, Carter's well maybe? Krukowski and Halpenny are also unanimous selections, and the line looks strong enough to survive any gridiron struggle. Harry Church, who is rated by many as the best middle wing in the intercollegiate, would undoubtedly have been a choice for one of the line positions had it not been for a series of accidents that kept him out of action for a large part of the season. Once again the outside wings may be the cause of argument, but the hard hitting McLachlin and the spectacular Johnny Keith would form a pair of "Giant Killers" that would be difficult to improve upon, and in case of substitutions either Newton or Dediana could ably fill the bill.

WHAT DO YOU THINK? Already now, you ever critical second guessers, let's hear from you, but don't be too severe with us, for "Like the poor benighted Hindoo, we did the best we kindoo."

### McGill Hockey Home Games

The following have been selected for the home games in Hockey for the Season 1931-32.

November 28th. — University of Montreal.  
December 7th.—Canadiens.  
January 19th. — University of Toronto.

January 25th.—M.A.A.A.  
February 8th.—Victorias.  
February 25th.—Queens.  
J. A. Edmison  
Approved by the President of the Athletic Board Society.

As this will be the only practice before the games start next Monday all those who intend to play must turn out. Tenders for the position of manager will be received by R. Henderson.

### M.W.S.A.A. SWIMMING

In the Knights of Columbus pool Nov. 26, at three o'clock, R.V.C. is holding a swimming meet. This is a new venture, and all women students are eligible. It is not an inter-year competition but an individual one, and there will be no eliminations. Bea Doull is the manager.

- The events will be:
1. Racing Back Stroke.
  2. Breast Stroke.
  3. Free Style.
  4. Crawl.
  5. Low Spring Board: three tries, optional, standing or running.
  6. High dive.
  7. Fancy dives.
  8. Long plunge: three tries.
  9. Side stroke.

## Many Candidates For Junior Team

### Prospects Look Good For Opening Game

McGill's entry in the local Junior A.H.A. was again put through a fast practice session yesterday afternoon at the Forum. Owing to the fact that most of the Seniors were taking a well earned rest after their win Monday night, the Juniors were able to take the ice in the regular Senior practice hour. A very large attendance featured the turnout and some promising material was uncovered. A number of the members of the Junior Football team made their first appearance and will no doubt strengthen the team greatly.

Three or four members of the Senior team took the ice along with the Junior candidates and lent their aid to Coach Bobby Bell. Flashes of mid-season form appeared in some of the more experienced men, while the others all showed up well. There is no lack of material and prospects look bright for the opening game next Saturday. There will be another practice before they stack up against the smart M.A.A.A. Juniors which should put the team on edge. Notice of this practice will appear in tomorrow's Daily. No one has been selected to pilot the Juniors as yet but an announcement will be forthcoming very shortly.

There are six teams in the Junior League this year and each one plays (Continued on Page Four)

## Senior Basketeers Work Out Daily in High School Gym

Coach Van Wagner Sends  
Out Call For More  
New Men

### VETERANS RETURN

NOW that Rugby is practically over for yet another year, McGill athletes are turning their attention to the hoop game. Every day sees from 15 to 20 perspiring aspirants going through a multitude of practice plays under the watchful eye of Coach Van Wagner, who expressed the hope that there should be full turnouts, from this date onward. Inasmuch as the majority of outdoor are a thing of the past, it is not an unusual picture to see stray basketballers come straggling back to the fold.

As far as the ultimate formation of either the Intercollegiate or the City-League team is concerned, it is too early in the practice sessions to do any predicting. In addition to the veterans of the team, one sees many new — and, in some cases, timid — faces on the basketball floor of the Montreal High School gym. Everything suggests activity and preparation for what is bound to be as hard and tortuous a basketball campaign as Van has ever had the task to conduct.

### Calhoun Not Back Yet.

One important cog in the Red machine who has not yet put in his appearance is the popular and hard-working Captain Bob Calhoun who, it will be remembered, was injured at Kingston in the McGill-Queens (Continued on Page Four)

## Freshman Squad Practice Diligently

### Juniors Meet Ontario Aggies In Saturday's Game

### EXPERIENCED MEN

McGILL'S freshmen football squad have earned the right to play the Ontario Agricultural College in a semi-final match for the junior championship of Canada. The game is being played at Molson Stadium on Saturday afternoon.

The red and white juniors go into the final series by virtue of defeating the former champions, Varsity Juniors, in Toronto last Saturday, and they are now favored to cop the title.

Five High Schools Represented.  
The freshmen squad should be an outstanding one as it is made up of recruits who played on top-notch high school teams last year. These players have now benefited by a season of play with the seniors in scrimmages, and an excellent coach in "Dunc" Anderson. "Shag" Shaughnessy is also taking an interest in the juniors, and has helped them out in several workouts.

Many of the players are from the Westmount High championship team of last year; Johnny Riddell, the captain, and a sturdy half-line per- (Continued on Page Four)

### BASKETBALL CAPTAIN

BOB CALHOUN, defense star on McGill's intercollegiate championship basketball team, is now out of the hospital and should be able to play after Christmas.

## Danish Party Gives Physical Education Display on Friday

World Tour Includes Many  
Canadian Cities In  
Itinerary

### ARRIVE THURSDAY

ON November 19th and 20th, Mr. Niels Bukh, Principal of the People's College, Ollerup, Denmark, and his 25 Danish men and women Folk High School Students, will give demonstrations of Physical Education in Montreal under the auspices of the National Council of Education. The party is on a tour around the world giving demonstrations in Russia, Siberia, China, United States and England. The performances here will be held at the Royal Montreal Regiment Armoury, 4625 St. Catherine Street, Westmount.

The tour through the North American Continent includes visits to Vancouver, Calgary, Edmonton, Saskatoon, Regina, Winnipeg, Minneapolis, Chicago, Detroit, London, Guelph, Hamilton, Toronto, Ottawa, Montreal, Boston and New York. Universities, School Boards and Y.M.C.A.'s in the given localities have arranged the demonstrations and been the hosts of the team.

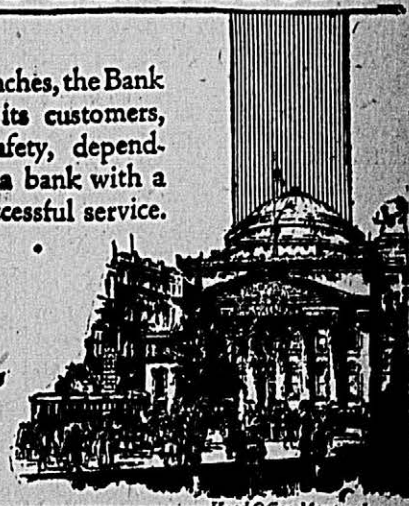

Visit University.  
The team will arrive in Montreal (Continued on Page Four)

### Soccer Notice

There will be a soccer meeting on Tuesday Nov. 24th, at 5 p.m. in the Reading Room of the Union. The 1932 States trip will be discussed in detail and a final decision will be made. Those who bought shoes make a special point of being on hand. All first team equipment must be turned in by Thursday. It should be left at Mr. Finlay's office in the Physical Education Department on University St.

The election of next years officers will also take place. Any one who cannot be present please notify Mr. Finlay or Geo. Owen well in advance. It is essential that there be a full turnout—the Union Reading Room Tuesday, 24th at 5 p.m.

## Classical Studies Hold Solution of World Situation

### Revival Of Civilization Seen As Duty Of University

#### MODERNITY PROVED

### Rev. Lawrence Clare Showed Value Of Greek Literature

"The task of the modern University is to bring back civilization," asserted the Rev. Lawrence Clare in an address on "The Present Value of Greek Literature" before the Montreal Classical Club which held its first meeting of the season last night in R.V.C. Professor McCullagh, of the Classics Department, the president of the Society, was in the chair. At the commencement he announced that the club was making a "new departure" by opening its doors to the public, and it was hoped that this would encourage an interest in the Classics, especially among the student body.

#### Classics Solve Crisis

"The most intense light it is possible to get on present day problems can be had from Ancient Greece," the Rev. Mr. Clare announced emphatically, and went on to show that the solutions for many of the issues which are facing the world today may be found by a study of Plato and other Greek Classics. In this way he impressed the fact that the "Ancient" Classics are really surprisingly modern. The speaker pointed out that Aristotle's book on Ethics contains the best solutions of ethical problems known to man, while his treatise on politics is used almost universally as a handbook for politicians of today.

The Rev. Mr. Clare laid great emphasis on the choice of the right text-books for the study of Greek, as these have a great effect on the cultivation of a Classical taste.

#### Failure of Democracy

"Democracy cannot manage an Empire." This striking quotation from Thucydides was next developed by the speaker to show that all Ancient History can be read with a modern parallel. Several very amusing and interesting passages from "The Realms of Gold" were read, illustrating the fact that the Classical authors dealt with matters which are of great interest to us today.

At the conclusion of the talk the meeting was thrown open to discussion. Dr. Woodhead, the chairman of the Department of Classics, said a few words of appreciation for the speaker's "honest plea" for the Classics, and characterized the address as "one of the greatest treats I have ever listened to." Opinions were also expressed by Professor Clark, Judge Howard and Greek residents in Montreal. The remainder of the evening was spent socially over the refreshments.

## Freshman Squad Practice Diligently

(Continued from Page Three) former, being particularly called to mind. Markham and Gordon team up with Riddell, Gordon handling the booting assignments in capable fashion. Thompson, a former Hamilton high school star, is a relief man for any one of these three, and his showing against Bishops three weeks ago should entitle him to plenty of work in the future.

George Clark, who plays at flying wing for the freshmen, formerly lined up with the Sarnia senior team, who are playing Western in the Eastern Canadian semi-finals on Saturday. Clark is a fine tackler, and incidentally a kicker of some repute in his former stamping grounds. Conklin, the junior quarterback is also a player who may make his mark in senior intercollegiate circles before he graduates, and who will be watched with interest on Saturday.

The Nancekville brothers, one who plays at outside, and the other at middle, both add strength to the freshmen aggregation, while Ken Findlay, former St. Andrew's outside wing, has proved himself capable of handling the same berth with the red and white juniors. Sam Grisdale is another junior player who could be able to hold his own at Stadium, as he received his foot-training on the Ottawa Glens Regulate teams, winners of several championships. He lines up at inside.

So, altogether the game with the Ontario Agricultural College will be watched with more than a little interest. Football of a high calibre will be played, and the McGill representatives now are probable senior intercollegiate stars of the future.

## Danish Party Gives Physical Education Display on Friday

(Continued from Page Three) from Ottawa at 11.45 p.m. on Thursday November 19th. On Friday at 10.00 a.m. they will pay a visit to McGill University. There will be a luncheon on the same day at Eaton's which the staff and students of the Department of Education will attend. That night the first demonstration for the general public will be given. Tickets for the evening performance on Friday are for sale at the Union.

The program is as follows:

- (1) Opening procession of the team with flag, song and salute.
- (2) Demonstration of Women's Fundamental Gymnastics.
- (3) Demonstration of Men's Fundamental Gymnastics.
- (4) Women's Exhibition Gymnastics closing with Singing Games.
- (5) Men's Exhibition Gymnastics closing with jumping and agility exercises.
- (6) Danish Folk Dances in old national costumes and Danish songs by the whole team.
- (7) Exit procession with salute and song.

#### Press Comments.

The following are examples of Canadian press comments on the Buch demonstrations:  
"Vancouver, Oct. 27th—"Presenting one of the most unique acrobatic displays witnessed in Vancouver. Niels Buch's famous group of Danish gymnasts demonstrated to a packed house in the University of British Columbia Gymnasium Monday night what may be accomplished through physical education."

The party consisted of 25 young men and women pupils of Professor Buch's internationally famous college at Ollerup, Denmark. Amateur performers trained entirely under Professor Buch, they have been drawn mostly from the farms of Denmark with a sprinkling from the professional classes, the audience was told. The programme opened with a procession, followed by a systematic display of light exercises by the women. As the women marched off the floor the men gymnasts, the muscles on their well-developed bodies looking impressive under the bright flood lights, took their place. At a command from their instructor, they commenced a series of body-building exercises, executed with perfect rhythm.

Then there was a display of acrobatic and agility exercises which few people of Vancouver have witnessed. Vaulting, somersaulting, hand-stands, tumbling and balancing were included.

To the tune of a Danish folk song, the women delighted the gathering with a series of light spring dances. As a fitting climax to the programme, men and women athletes tramped out on the floor, clad in the colorful costumes of their native peasantry. To the strains of a lone fiddler they executed a Danish Folk dance.

Calgary, Oct. 30th—"More than 7000 Calgaryans attended the two performances given at the armories Thursday by Niels Buch, creator of a remarkable system of physical training, and his 24 smiling athletes, students of his People's College, Ollerup, Denmark. For more than an hour on each occasion the movements of the two groups were watched with intense interest, so entirely different was the system from the usual physical culture exercises. This portion of the program was frankly educational, without any flourishes, yet the applause was just as enthusiastic and prolonged as in the demonstrations which climaxed the program and which were of a more spectacular nature."

The simple exercises left the observer with an impression of utmost ease and grace. Every part of the body was brought into play, and it was easy to believe the claim advanced for the system that stiffness and soreness of muscles are minimized to an unusual extent. Without a note of music for accompaniment, both the men's team and the women's team went through their movements with a degree of rhythm which was fascinating. Perfect freedom lent a joyous note to what most physical culturists are likely to consider an arduous task."

Edmonton, Oct. 31st—"Giving what

## Medicine Receives Valuable Bursaries

### Names Of Two McGill Graduates Perpetuated

An announcement to the effect that two new scholarships have been made available in the Faculty of Medicine, was made at the Bursar's Office yesterday. These scholarships, it was announced, will be awarded for the first time this year.

One of them, having a value of \$500 was made possible through the will of the late Dr. J. F. Williams, who graduated in Medicine at McGill in 1886. The main qualification necessary for this award is highest standing in medicine and clinical medicine in the final year. In order to procure this award, further study and researches will be necessary.

The second scholarship was the gift of the widow of the late Dr. J. H. B. Allan, a graduate of the Faculty of Medicine at McGill in 1885. It has a value of \$300 and will be awarded annually to either a graduating student or a recent graduate in medicine.

These two scholarships in the Faculty of Medicine will afford greater opportunity and encouragement for the student who acquires proficiency in his studies.

## Organization Can Overcome Crisis In Unemployment

(Continued from Page One)

which the individual has no control. Professor Marsh revealed several striking facts concerning unemployment. In Canada, employment has actually increased 30% during the last ten years, but this is not in keeping with the rise in population. Such seemingly irrelevant matters as the growth or decrease of crimes, deaths, marriages, births, and the rise of radical movements are all intimately connected with unemployment. Perhaps it is only economic conditions, which can make the nations realize the advisability of disarmament.

The second in the series of lectures by Professor Marsh will be delivered next Tuesday at 8:30 at the Central Y.M.C.A., and will deal with "Trade Cycles."

## Many Candidates For Junior Team

(Continued from Page Three) ten games. These games are played at the Forum every Saturday afternoon commencing Saturday, Nov. 21 and ending Saturday, February 27. A double-header will take place each time, starting at 2.15. A two game series, total goals to count, between the two leaders will decide the Championship at the end of the season. The teams which form the league are Victorias, Canadiens, M.A.A.A., Loyola, Columbus and McGill.

was without doubt the finest display of gymnastics ever seen in this city, amateur or professional. Niels Buch and his brilliant Danish troupe of 25 men and women pupils amazed the crowd of fans that attended the two-hour program at the Arena last night. As the participants went through their various gymnastic motions, displaying phenomenal muscle control and perfect timing, they were cheered to the echo.

The male members of the troupe are perfect specimens of manhood and their wonderful rhythm and muscle control was plainly demonstrated as they went through their acts. Tumbling and hand springs were brought into view in slow motion style.

The group of twelve beautiful girls were the favorites with the audience. Their native folk songs were sung as they performed their exercises.

All in all the crowd enjoyed the greatest gymnastic show that has ever been the good fortune of this city to witness."

Regina, Nov. 3rd—"Presenting a two-hour program based on the fundamentals of physical training and body developments, the Danish gymnasts, under the direction of Professor Niels Buch, entertained an audience of over 5000 in the Armouries on Tuesday night with a clever and entertaining card."

The presentation was made possible by the local officials of the Y.M.C.A., who obtained a showing of these clever young people now en route across Canada after a successful tour of the Orient. There are 25 in the company and their rhythmic display of all physical training routine to the more difficult feats of gym work and hand springs, was applauded continuously throughout their two hours program.

The prevailing idea behind the Buch method of development is slow, perpetual and graceful movements. One action of their routine follows the other in a rotation which is continuous and yet completely lacking in military precision. The commands are given by the professor in a sharp staccato manner, but the orders are carried out with slow graceful movements that gives the score of gymnasts the appearance of the movement of a single person."

## "Old McGill" 1932

#### Arts

Arts Seniors are urged by the Annual Board not to miss their appointments for graduating portraits. The hours for sitting at Notmans are 9-10 a.m. and 4-6 p.m. Do not forget that a charge of \$2.75 will be collected at Notmans. Following are the lists for today and tomorrow.

#### Today

Gales, D. L.; Gillean, W.; Gilroy, G. S.; Goodstone, G. L.; Hart, I. R.; Heuser, H. K. M.; Horne, R. M.; Howard, R. P.; Ignatoff, L.; Johnson, G. H.; Jones, R. M.; Judd, E. E.; Kembell, A. W.; Laird, R. P.; Lesser, E.; Levine, R.; Levitt, J.; Levy, N. L.; Lewis, R.; Lloyd, D. C. P.; Lusher, D. C. W.; Lyon, H. P.; MacFarlane, G. N.; McHugh, H. E.; McIntyre, J. M.; MacLellan, W.; MacLeod, D. I.; McNiff, N. E.; Mastrinn, M. A.; Merseureau, H. C.; Minnion, A.; Morgan, G. L.; Murdock, A. E.; Nixon, J. S.

#### Tomorrow

Parsons, H. E.; Payton, J. R. T.; Poland, F. W.; Porteous, J. F.; Prazoff, I.; Quinn, L. J.; Ritchie, A. S. C.; Ritchie, K. S.; Roston, B.; Rowat, J. P.; Sahill, D.; Scheeter, N.; Sellar, W.; Shapiro, G. S.; Shaw, H. C.; Scheeter, Arthur; Smith, R. H.; Smyth, J. N.; Sutherland, R. W.; Thomas, W.; Trimmingham, H. L.; Turner, D. C.; Warner, H. M.; Watson, T. J.; Webb, D.; White, E. J.; Wills, N. J.; Zimmerman, G.

## Senior Basketeers Work Out Daily in High School Gym

(Continued from Page Three)

Rugby game several weeks ago. Bob is still reported on the sick list, and it is difficult to predict whether he will be available for some days to come.

Don Young and Mel Rice are two oldtimers who are expected out daily, as their presence is no longer required by Rugby and English Rugby respectively. George Faulkner, Don Small and Bunny Talpis are already hard at work sending basketballs through the hoop, and tearing up and down the floor in solo efforts.

#### Many Newcomers.

This year, more than formerly, there is scarcely a scarcity of new students trying for a place on one of the teams. This is no doubt due to the encouragement that Coach Van Wagner extends to all newcomers. All men who have played high school basketball or its equivalent should have a good chance to make the McGill team. There is still room for many.

## Seniors In Arts Express Opinions On Departments

(Continued from Page One)

cannot appreciate the jokes of the French professors, which they would not appreciate anyway, because there isn't enough practice in French conversation," and Donald Black, who remarked that "French is an excellent course for unemployed gentlemen who sit back and take life easy."

Alma Johnson, a prominent senior in R. V. C., found fault with the biology department. She said, "I used to think Zoology was the weakest department but one whiff from the Lab immediately convinced me that it is the strongest."

Margaret Dadds seemed disgusted with the Chinese Studies department, for after taking it for a year, she still can't read her laundry ticket. Ken Baker had but one word to say, about the Physics department namely, "Amend that constitution." Rose Zahalan said that the Geology Department had always seemed weak to her, but it seemed to be a pretty strong class. Tapping rocks with a hammer seems to produce music.

Many other notables were interviewed, but continuously refused to vouch safe any opinion.

## S. C. A. Notices

Professor R. B. Y. Scott's Introductory group on the Bible will meet Thursday evening at 7.30 p.m. in Strathcona Hall. All first year people are cordially invited to be present.

The finance committee of the men's S.C.A. which was formed last Friday will meet tonight at six o'clock in the Hall for a supper meeting as planned. All members are urgently requested to be present.

The Joint Boards of the men's and women's S.C.A. will meet tonight at five o'clock in the Hall, and will adjourn in time for the finance meeting at six. At 7.30 the joint study group led by Mr. Stewart will meet for its fortnightly discussion.

A Vesper Service of Worship, under the auspices of the S.V.M. is being planned for Friday evening at 5.15 o'clock and will be held in Divinity Hall. The service will last about half an hour. All members of the University are cordially invited to be present.

## Doubleheader Polo Fixtures Set For Tonight at Y.M.H.A.

(Continued from Page Three)

league standing. The encouraging thing about the junior's play is their absence of any particular stars, and the way in which the lads work together. The combination is still a little weak, but that is a condition which a little practice will remedy very easily. The material is there and Coach Fisk will develop it as he has done so often in the past.

Perhaps the one fault, with the Juniors this year is the plethora of junior material, if that can be considered a fault, which may have kept some of the promising men from recognition. Still if every man on the team practices regularly, they will all get their chance even if they have to wait till next year, when it is rumoured that McGill will have two Junior entries in the league.

#### Seniors Warned

The seniors are reminded that only a little over two weeks remain before the first game of the intercollegiate season. Coach Fisk is not very well satisfied with the way in which the boys have been coming down to practices, and he warns the senior candidates that if they do not put in frequent appearances at the pool during the next two weeks that he will play Junior material in their places, even if he has to go into the Varsity game without any experienced substitutes. A winning team cannot be built up without a great deal of hard work, and if any members of the team think that they can hold their places on the team by virtue of their performances in other years, they are likely to find their places given to men who are willing to practice and learn, even if they are not as skilful at present as the men whose places they will take.

There will be no regular practice this evening due to the games to-night, but the members of the squad who, are not down to play are advised to go down to the pool and get a little practice in ball-handling when the tank is comparatively vacant.

The following is the list of players for tonight's two games:—

Seniors	Juniors
Wayland.....goal	Tessier
Mathams.....r. back	Wilson
Payton.....l. back	Urquhart
French.....half	Worrall
Bourne.....centre	Shapiro
Davis.....l. wing	McLean
Stein.....r. wing	Shragovitch
Dolg.....reserve	Ripstein
Shaw.....reserve	Cross

## Apartments And Homes Considered In Cercle Debate

(Continued from Page One)

necessitates less work, less expense, and is more convenient.

#### Promotes Disease

"Apartments are conducive to laziness," stated d'Honclthun for the negative. The crowded apartments breed disease. Microbes abound in such places, which make it very unsafe for bringing up children. There is much more comfort in a private house and an intelligent person wouldn't live in an apartment.

From an esthetic point of view, apartments are an eye-sore, for very few of them are architectural masterpieces. They spoil the appearance of a modern city.

## Band Featured at Graduates Reunion

(Continued from Page One)

and Mining Building laboratories. The special demonstration in the Pul' and Paper Institute was appreciated by the graduate chemists and engineers.

The Reunion which is held but once every five years was a great success and lived up to its predecessors.

## Players' Club

The following are the ushers for "From Morn Till Midnight."

Thursday and Friday evening: Ray Hudson, Pat Temple, Kay McKenzie, Connie Brown, Lorraine Slesson, Mary Strachan, Phyllis Bennett, Helen Brown, Margaret McKay. Saturday matinee and evenings: Ray Hudson, Pat Temple, Kay McKenzie, Connie Brown, Mollie Hankin, Thelma Mitchell, Doreen Harvey, Jolie, Margaret Cameron, Audrey Shaw.

McGill blazers and white skirts will be worn. For any further information call Bill Macintyre at Elwood 5072.

## Correspondence

(Continued from Page Two) spectral lines of a receding object will be shifted to the red, and of an approaching object to the violet has nothing to do with the faintness of the light whatever. The red Doppler shift of all nebulae observed to date is, in fact, the chief experimental basis for the expansion theory. May we suggest that if you have

## NOTICES

Notices must be legibly written on one side of the paper only. They must be handed in to the Daily office before eight o'clock on the night previous to publication. For sale notices not accepted.

#### CHORAL SOCIETY

There will be a meeting of the Executive of the Choral Society on Thursday night in Strathcona Hall at 7 o'clock. Everybody is requested to turn out. (44)

#### CHEMICAL INDUSTRY CLUB

The Club intends to visit the Robert Mitchell Co. on Friday, November 17th. Those intending to make the trip are asked to be at the Chemistry Building at 2 p.m. sharp on that date. Cars are the only means of transportation available and all those owning cars are urgently asked to bring them. (44)

#### DEBATING UNION EXECUTIVE

There will be a meeting of the executive of the Debating Union Society in the Union, at 1.00 p.m. today. (40)

#### GLEE CLUB

The Glee Club will meet tomorrow, November 19th, at 7.00 p.m. in the ballroom of the Union. (41)

#### ATTENTION ARTS '32

Biography forms for the Annual are now obtainable from Bill Gentleman in the Arts Building. Get yours, fill them out, and return to Bill Gentleman as soon as possible. (43)

#### ARTS '34 DEBATERS

There will be a meeting to organize an Arts '34 Debating Competition and draw up plans for the session, tomorrow afternoon in Room 70 of the Arts Bldg. at 5:00 o'clock. It is important that there be a representative crowd, so all interested are invited to come. The following will kindly turn out:

F. C. Leland, M. J. Boxsir, W. T. Hasler, W. H. Clark, D. R. Anderson, W. A. Sugars, R. M. Hamilton, M. E. Goldenberg, M. W. Bloomfield, J. R. Goldstein, E. H. Cohen, J. Laureys, L. P. Lebel, W. T. Shute, Lennox and Mac. Ransom. (40)

#### ENGINEERS' FROLIC

Tenders will be received for orchestras for the Engineers' Frolic dance to be New Year's Eve. All tenders should be in the hands of Harry Grimsdale in the Engineering Building before November 21st, 1931. (43)

#### ELECTRICAL ENGINEERING GRADUATE COLLOQUIUM

At the Graduate Colloquium to be held today at 5.30 p.m. in Room 35, Engineering Building, Mr. A. Kruming

no reporters acquainted with Physics and modern Physics in particular, you might approach the Secretary of the Physical Society with a view to having him cover such lectures for you. If this cannot be arranged, it would be better not to report them at all. The lecturer would feel much less hurt in being neglected than at being misrepresented.

Yours, truly,  
(Signed) W. K. Dunn  
R. N. Haslam  
J. F. Heard  
A. H. Snell  
R. L. Thornton

B.Sc. (M.I.T.) will present a paper on "The Natural Modes of Coupled Circuits." Mr. Kruming has developed methods of graphically determined resonance frequencies of networks containing as many as five meshes. All students invited to attend.

#### S.C.M. OF MCGILL AND R.V.C.

There will be a regular joint meeting of the Cabinets of the S.C.M. today at 5.00, followed by supper and the Joint Cabinet Study Group at 7.00. Both Men's and Women's Cabinets are requested to be present. (43)

#### ENGINEERING '35 — ATTENTION

There will be a meeting of the class of Engineering '35 on Thursday at 5 o'clock, in Room 33 of the Engineering Building. All those interested in Class Pins and Class Pictures are asked to make their presence conspicuous. (43)

#### PERSONAL

Will the green-clad girl who received a poem in the Library Tuesday afternoon please note that the signature was forged. (43)

#### LOST

LOST Pair of steel rimmed spectacles in hard black case. Kindly return Harry in Engineering Building or Bert Yates in Tuck Shop. (42)

A gold watch with Jean Smith, 1925 on reverse. Please return to R.V.C. or call AM. 2392. (43)

A book of student coupons with the name Murray E. Wright on the cover was lost on Saturday probably at the Stadium. Finder please leave with Bill Gentleman. (43)

Will anyone finding a black and gold fraternity pin with name on back please leave with Bill Gentleman or return to R. V. Haley. Reward.

#### LOST

Glasses and case on campus. Please leave with Bill Gentleman, or call Marquette 6467. (43)

At S.C.A. Dance, a bracelet. Finder please telephone WE 6886 or leave at Strathcona Hall. (40)

#### FOUND

At S.C.A. Dance, a bracelet. Phone WA 1506. (40)

Fraternity pin found by Mr. Delisle of 4406 Ernscliffe Ave., N.D.G. Distinguishable letter is Delta. (43)

In Physio's Building, black Waterman's Fountain Pen. Apply to Harry Grimsby, Engineering Building. (43)

## Nominations

Nominations for Faculty Representatives to the Students' Executive Council are called for.

Nominations must be in writing and signed by at least ten undergraduate students from the Faculty which the nominee is to represent.

Nominees must be students of the Junior Year of the Faculties of Arts and Science, Engineering, Medicine, Law, Dentistry, School of Commerce, Theology and the Royal Victoria College.

Nominations must be in the hands of the Secretary of the Students' Society by 12.00 noon today.
